Subject: Lahaina WWRF draft permit

Hi Milton, You may want to print this out as a record of communication for the Lahaina WWRF file.

Mike Ratte with Maui County called regarding a pretreatment program that they are trying to get County council support on. I let Mike know that they should be receiving the draft Lahaina permit in about two weeks--once we receive HDOH's UIC comments. I also let him know that we would be public noticing it, sending it to libraries, and to interested individuals. He said that the Maui News has a wider readership than the Lahaina News, so that is probably the best paper send the notice to. I also mentioned that Wendy is thinking about holding an informational meeting for those who have questions on the draft permit. We also went over the conditions such as: new wells for back up only, flow limits--both peak and average (using their current average); no nutrient limits; and monitoring wells along with looking at other water wells that can be used as monitoring wells. Mike asked what would happen when they increased the capacity of the plant. I said that there is a provision in the permit that they can request increased flow and it can be negotiated. I did say that we want to limit the flow because we don't know the extent of the plume in the USDW and this will help reclamation. --Shannon
